Addendum to:

APPLICATION FOR PERMISSION TO CHANGE POINT OF DIVERSION,
MANNER OF USE AND PLACE OF USE OF THE PUBLIC WATERS OF THE
STATE OF NEVADA HERETOFORE APPROPRIATE

Claim 429 (180.0 acres)

15. Remarks:

The purpose of this Application is to temporarily replace the point of diversion recognized in the Alpine Decree with what Applicant believes is also an historic point of diversion. In addition, the point of diversion recognized in the Alpine Decree now has severely restricted capacity as a result of urbanization. A permanent Application has been filed but not yet acted upon. A temporary permit is necessary and justified to allow irrigation this season. The lands to which the water right proposed to be changed by this Application is appurtenant are not lands whose water right was transferred to the Allerman Canal when the 1/3-2/3 Alpine Decree provision is in effect. However, Applicant will continue to cooperate with the Federal Water Master in order to avoid litigation concerning the issue of whether this water right may be exercised when the 1/3-2/3 provision of the Alpine Decree is in effect. This voluntary cooperation will continue to be without prejudice to any position the Applicant or the Federal Water Master might take if that issue must eventually be litigated. However, if that issue cannot be resolved, it will have to be resolved by the court having jurisdiction over the Alpine Decree.
